# Introduction

By Amanda Bennett

When I was a child, we spent many hours playing Hide and Seek, both outdoors and indoors. It was always a challenge to find that perfect hiding place so that I couldn't be found. Sometimes we would play at night, wearing dark clothing so that we could really camouflage ourselves! It was fun to hide, but we had to work at it, unlike the animals that God created with camouflage built right into their bodies.

In *Creation Camouflage*, your child will learn all about how and why animals hide in different parts of the earth, from oceans and rain forests to deserts and even the tundra. Your child will be watching videos of animals from around the world while learning about some of the most amazing forms of camouflage that make it hard for us to see these animals.

What can compare to the animals that God has created? From the tiniest tadpole to the tallest giraffe, God has made each one and fashioned them all with amazing and unique features. Learning about the camouflage of animals, let your child see and learn about His creation from some of His mightiest handiwork.

With Download N Go™ unit studies, you are about to begin a new kind of learning experience. Each study is one week in length, having five daily lessons with lapbook components for each day. The name, Download N Go™, comes from the concept that these studies are ready to use as soon as you have downloaded them. No preparation or waiting time or other expensive resources are required. A few inexpensive items are needed for the lapbook—a simple file folder, a glue stick, safety scissors, brass brads, and crayons or markers. That's it—simple, effective, and what a way to learn!

Now that you are beginning *Creation Camouflage* in the Download N Go™ Series, get ready for a wonderful learning adventure into the world of these striking creatures. Your child will investigate many animals—what they eat, how they use camouflage, where they live, and much more. Each day your child will explore and investigate, creating and adding more learning components to the *Creation Camouflage* lapbook—building a wonderful reminder of all that he is learning to be enjoyed for years to come.

As I write this study, I am amazed to see these creatures that are so well hidden all over the world, and just how much has been learned about them in recent years.

The research and study of animals has grown by leaps and bounds with the rapid growth of technology, providing a wide-open door of adventure for our children to explore. Just wait until you see some of these animals and their very intricate, God-given camouflage!

While you are enjoying *Creation Camouflage*, look ahead to *Marvelous Moon* and *Crunchy Cookies*—upcoming titles in the Download N Go™ Series that continues to grow!

**Notes to parents:** *Remember that Internet site content can change overnight. Please check the sites that you plan to use before your child visits them in the study.*

*Some of the videos in this study are hosted by YouTube and include Google ads that cannot be completely avoided. These ads can be hidden by clicking on the X in the upper-right corner of the ad banner.*

*To conserve printer ink, please note that most printers have a variety of printing options (draft mode, economy mode, grayscale, black and white, etc.) which may reduce your ink usage. Refer to [this guide](#) for assistance in exploring your printer's options.*

# Introduction to Lapbooking

By Stephanie Ruby

Have you ever created a lapbook with your child? The lapbooking activities we have designed are made to be easy enough for a beginner, but “meaty” enough for children who have been lapbooking for a long time.

There are only a few items that you need to provide to go along with the activities we have created. You will need a file folder, folded so that the outside edges meet in the middle, creating a “shutter book.” You will also need scissors, glue, crayons, a stapler, and brass brads.

You may want to save each activity in an envelope until the entire week is complete and then attach everything to the lapbook on the fifth day. This will allow you to arrange all of the mini books so that they fit well. This is not a necessity, mind you, but simply a recommendation that might allow the process to flow a bit more smoothly.

If you have never created a lapbook before, you may feel a bit intimidated by the process. Take a deep breath and remember that there is no “wrong” way to lapbook. The process of lapbooking will vary from one person to the next, and will be a reflection of the individual that created the project.

For those of you who still feel that you need a little more guidance, we have included the following links to introduce the concept of lapbooking to you and to give you a variety of ideas for your project. Just remember, the most important part of lapbooking is to have fun with it. The more you and your children enjoy the activity, the more they will retain.

Now, let’s get on with the fun!

# Day 1

## Hiding in Plain Sight

Have you ever played Hide and Seek? In this fun game, you and some of your friends hide, while one friend counts to 20 and then tries to find you. When you are hiding, how do you make sure no one finds you? Do you stand in plain sight or do you hide behind or underneath an object?

While we play Hide and Seek for fun, animals have to hide to stay alive. For some of these animals, their way of hiding is simple; they can be in plain sight without anyone or anything noticing them. While you would be quickly found in a game of Hide and Seek by standing out in the open, these animals are not so easily found. Take a look at some animal pictures here:

[Animals in Plain Sight](#)

[Find the Hiding Animals](#)

Aren't these animals amazing? God gave them each a special way of hiding, called camouflage. Were you able to find them all? Some of them were very tricky!

What is the definition of the word camouflage?  
*Write your answer below.*

[Camouflage](#)

Video: [Camouflage](#)

[Exploring Animals with Camouflage](#)

What are the four types of camouflage?

[Woodpecker](#)

[Grasshopper](#)

We know that God created the heavens and the earth and all of the animals. He also gave many of these animals camouflage so they are able to defend themselves and hunt. *Read the story of Creation.*
